4/30/2020 1:39:12 PM

This notification is informational only. California regulations require a farmer to provide annual notification of the pesticides expected to be applied to agricultural crops within ¼ mile of a public K-12 school or a licensed child care center (schoolsites). This notification pertains to the farmer listed below. The pesticides listed are expected to be used during the July 1, 2020 - June 30, 2021 period. If a farmer needs to use a pesticide that is not included on the list, schoolsites will be informed at least 48 hours prior to use.

California regulations also prohibit specific pesticide applications to agricultural crops within the following distances of a schoolsite during Monday through Friday, from 6:00 a.m. to 6:00 p.m. which include:

- Applications with potentially higher drift are prohibited within ¼ mile (1,320 feet) of a schoolsite, such as fumigations and applications using aircraft.
- Applications with lower drift are prohibited within 25 feet of a schoolsite, such as most applications using a tractor.
- Applications with negligible drift have no distance requirement, such as applications using a hand sprayer or within a greenhouse.

Negotiation alternative

California regulations include an option for a written agreement between the farmer, the principal or child care center administrator, and the county agricultural commissioner that specifies alternative application restrictions that the parties agree provide the same or a greater level of protection as provided by the prohibitions described above. For example, the three parties may establish alternative restrictions to address extracurricular activities that occur during evenings or weekends. A request to discuss alternative restrictions must be sent to the county agricultural commissioner.

The county agricultural commissioner may be contacted for questions or additional information, if violations of these requirements are suspected, or for other non-emergency situations.
