School District Integrated Pest Management Plan

When completed, this template meets the Healthy Schools Act requirement for an integrated pest management (IPM) plan.

An IPM plan is required if a school district uses pesticides¹

habitat less conducive to pests using sanitation a manner that minimizes risks to people, property, a Our pest management objectives are to: (Example:)	strict to implement IPM by focusing on long-term prevention or suppression of pests monitoring for pest presence, by applying appropriate action levels, and by making the and mechanical and physical controls. Pesticides that are effective will be used in a and the environment, and only after other options have been shown ineffective. Focus on long-term pest prevention)
Focus on long-term pest prevention through educ Elimination of significant threats caused by pests	cation awareness and site personnel behavior changes in habit modification. to the health and safety of students and to the public. The prevention of loss or protection of the environmental quality inside and outside of buildings.
IPM team In addition to the IPM Coordinator, other individual complying with the Healthy Schools Act requirements	als who are involved in purchasing, making IPM decisions, applying pesticides, and ents, include:
Name and/or Title	Role in IPM program
Nick Curry, M&O Manager	Oversees and manages references and website material
Becky Gibbs, Administrative Asst.	Liaison with school sites and pest control vendor
Valley Pest Services	Pest Control Provider - oversees Health Schools Program, compliance with HAS, Valley Pest Services employee training
Pest identification, monitoring and ins Pest Identification is done by: Valley Pest Services	est Services strict has confirmed that the pest control business understands the of the Healthy Schools Act. spection iversity staff, Pest Control Business, etc.)

Specific information about monitoring and inspecting for pests, such as locations, times, or techniques include: (Example: Sticky monitoring boards are placed in the kitchen and are checked weekly by custodial staff.)

Visual inspection, removal techniques and use of sticky traps to monitor activity are used as a tool before pesticides are considered. All pest application services are conducted after regular school hours on the second Wednesday of each month with the exception of Thanksgiving and Spring break if there is a campus closure.

Pests and non-chemical management practices

This school district has identified the following pests and routinely uses the following non-chemical practices to prevent pests from reaching the action level:

Pest	Remove food	Fix leaks	Seal cracks	Install barriers	Physical removal	Traps	Manage irrigation	Other
Cockroaches		V	✓	Ø	Ø	V	Ø	seals of doors
Ants	Ø	V	✓		Ø	4	Ø	seals of doors
Fire Ants	\square	7	$\overline{\checkmark}$	2	Ø	4	Ø	seals of doors
Spiders	Ø	✓	V	✓	Ø	Ø	Ø	seals of doors
Crickets	V	✓	✓	V	Ø	Z	Ø	seals of doors
			0					

Chemical pest management practices

If non-chemical methods are ineffective, the school district will consider pesticides only after careful monitoring indicates that they are needed according to pre-established action levels and will use pesticides that pose the least possible hazard and are effective in a manner that minimizes risks to people, property and the environment.

list includes pesticides that will be applied by school district staff or licensed pest control businesses.):
